

Email address if traveling outside of the country: _____

On occasion a pet may become ill with **minor** conditions while boarding. The most common ailments are diarrhea, vomiting and lack of appetite. We will do our best to contact you at the numbers provided above; if we are unable to reach you, we will examine and treat the condition as needed for the health and comfort of your pet and follow up with you pending the results of the exam.

--Additional costs will apply—*Initials:* _____

If a serious medical emergency arises while your pet is boarding with us we will do our best to contact you at the numbers provided above. In the event we cannot contact you, we will use our best judgment to decide what treatments would be appropriate which may include transfer to a 24-hour hospital for care.—*Initials* _____ Financial Limit? _____

In some cases we may need to obtain medical records for your pet. If we are not your regular pet care provider please list the name of the veterinary facility where your pets receive care:

Any additional information we should be aware of while your pet is boarding with us? (i.e, food allergies, health concerns, behavioral concerns, personality traits) _____

In the unfortunate event of the death of your pet while boarding we will hold your pet until body care instructions are provided to us.

For the protection of all boarders, we require current vaccinations for DHPP in dogs and FVCRP in cats. Rabies vaccines need to be current according to local laws. Bordetella vaccine (kennel cough) is required every six months. If you do not bring verification, or we cannot confirm vaccine status, we will vaccinate your pet at our charge. Gunbarrel Veterinary Hospital is not responsible for lost or destroyed toys, blankets, beds, or additional belongings.
